

A wide-angle photograph of a modern architectural space, likely a lobby or atrium of a corporate building. The space features multiple levels connected by curved walkways and stairs. The walls and railings are made of glass, reflecting the light and the surrounding curved structures. The overall aesthetic is clean, bright, and futuristic.

Build RPA

RPA Build – Developing workflows

-
- Review and sign off extra requirement list after PDD sign-off
 - Constant mentoring and increasing the capabilities of the RPA Developers
 - Troubleshooting and debugging
 - Logging and reporting
 - Source control owner of the solution
 - Performance improvements and quality check
 - Managing risk identification and risk mitigation strategies
 - Solving complex technical issues
 - Assisting in Unit and Functional testing

RPA Test – Quality assurance

Code review

- Thorough code review – activity level
- Follow the agreed standard and guidelines
- Naming strategy
- Optimal techniques
- Hard coded values vs Config
- Assets vs config files
- Duplicated code
- Scalability and Maintainability
- Clean code

Audit

- Credentials for applications usage
- Scope limitation of credentials
- Check against exposing sensitive information (send mail, save file, etc.)
- Check against modifying configuration parameters

A large, modern architectural space with multiple levels of curved, glass-enclosed walkways and stairs. The lighting is bright and even, highlighting the clean lines and curves of the design.
